PROJECTS

Website for Pet Preform Manufacturing Company

2024

- Designed the professional and highly interactive B2B website for a Lucknow-based pet preform manufacturing firm. The website is designed to increase the visibility of the brand, get the potential business clients, and assist in customer inquiry. It is functioning as an online shop, visualizing the company products, manufacturing capacity, and contact information to establish confidence with potential customers.
- Tools Used: React JS, Tailwind CSS, Google Maps API, Node.js/Express.js, AWS, MongoDB

Travelling Assistance Website

2024

- A travel portal that transforms according to requirements, built with React, HTML, and CSS to assist individuals in finding the most touristy places to visit in India. Created a user-friendly and seamless layout for an excellent experience. Achieved real-time content loading, enhanced performance for quicker access, and ensured it is accessible on all devices for convenient browsing.
- Tools Used: HTML, CSS, JavaScript

Interactive Chess Game

2025

- Developed a real-time multiplayer chess game using Java, JavaFX, and WebSockets, featuring AI-powered gameplay and seamless network communication.
- Tools Used: Java, JavaFX

TECHNOLOGIES

Languages: Java, HTML, CSS, JavaScript, Golang, SQL

Frameworks and Technologies: React, Node.js, Tailwind CSS, Generative AI
